

SI SCHOOLS Application

Recapturing the healthy mission of sport

Sports Illustrated, the Center for Health Promotion Research at the Oregon Health & Science University, and the Michigan High School Athletic Association are partnering to reduce drug and alcohol use and improve nutrition among high school athletes. At this time, the Center is accepting applications for high schools in Michigan to become SI Schools.

SI Schools will implement the proven effective, drug prevention and health promotion programs, ATLAS and ATHENA. SI Schools will receive training, program materials, ongoing support during the 2006-07 school year and SI gifts. They will also be recognized by Sports Illustrated as pioneers in preventing drug and alcohol use among high school athletes.

Please submit your SI School application by fax (503-494-3044) before May 1, 2006. The Center will confirm application receipt via email. Schools may be contacted for additional information. The four winners of the Michigan SI Schools award will be highlighted at the Sports Illustrated ATLAS & ATHENA Conference on November 9, 2006 at a location to be determined.
